SHELL SCRIPT

AIM: To write a Shell script to reverse a given digit using looping statement.

PROGRAM:

echo "Enter a number:"
read n reverse=0 while
[\$n -ne 0]; do
remainder=\$((n % 10))
reverse=\$((reverse * 10 + remainder))
n=\$((n / 10)) done
echo "Reversed number: \$reverse"

INPUT & OUTPUT:

```
(kali@kali)-[~]

$\footnote{\text{sh}} \text{rev.sh}

\text{(kali@kali)-[~]}

$\footnote{\text{sh}} \text{rev.sh}

Enter a number: 321

\text{(kali@kali)-[~]}

$\footnote{\text{sh}} \text{rev.sh}

Enter a number: 3453

Reversed number: 3543
```

RESULT:

Hence, reversing number using shell script is executed successfully.
